

Kunwar Shaurya Pratap Singh

Full-Stack Developer & AI/ML Builder

kunwarshaurya28@gmail.com | +91 90580 75463 | LinkedIn | GitHub | Portfolio

Summary

Third-year B.Tech CSE student specializing in AI & Data Engineering at VIT Vellore with a CGPA of 9.02/10. Product-focused builder with experience across full-stack development, AI/ML systems, and UI/UX design. Built deployed products using React, Next.js, Node.js, FastAPI, PostgreSQL, LangChain, TensorFlow Lite, and Solidity. Seeking Software Development, Frontend, Full-Stack, or AI/ML internship roles.

Education

Vellore Institute of Technology, Vellore

Aug 2024 – May 2028

B.Tech in Computer Science and Engineering, Specialization in AI & Data Engineering

CGPA: 9.02/10

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Machine Learning, Probability & Statistics, Computer Organization

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, C/C++, Solidity

Frontend: React.js, Next.js, Tailwind CSS, Vite, Zustand, Recharts, D3.js, Figma

Backend & Databases: Node.js, Express.js, FastAPI, REST APIs, JWT, PostgreSQL, Redis

AI/ML & Data: LangChain, FAISS, Groq, TensorFlow Lite Micro, XGBoost, scikit-learn, pandas, NumPy

Tools & Platforms: Git, GitHub, Docker, Postman, Web3.py, Hardhat, Railway, Vercel

Experience

MyPerro

Aug 2024 – Present

Frontend Developer & UI/UX Designer

Remote / VIT-TBI

- Designed product UI/UX flows, brand creatives, and launch collateral for a smart pet-tech startup across web, app, and investor-facing touchpoints.
- Contributed to Shark Tank India Season 5 Campus Special preparation through branding, packaging, presentation assets, and product experience design.
- Built reusable design assets and improved visual consistency across product screens, website sections, marketing creatives, and demo materials.

IEEE Computer Society – VIT

Feb 2025 – Present

Senior Core Member – Technical & Design

Vellore, India

- Contributed to technical and design initiatives for IEEE CS-VIT, including official chapter platforms and event/hackathon interfaces.
- Helped ship platforms for events such as Hack Battle, supporting participant-facing flows for 500+ users with responsive UI and clear information architecture.
- Collaborated with cross-functional teams on frontend development, UI/UX design, technical execution, and junior member guidance.

Projects

DevBoard – Indie Talent Marketplace | *Next.js, React, Node.js, Express, PostgreSQL, JWT, Tailwind CSS* GitHub
| Live

- Built a full-stack marketplace where founders post scoped software projects and developers browse, filter, and apply with focused pitches.
- Implemented authentication, project CRUD, stack/budget filters, application submission, applicant review, and user dashboard workflows.
- Designed PostgreSQL schemas for users, projects, and applications; deployed frontend on Vercel and backend/database on Railway.

ExamChain – Zero-Trust Examination Infrastructure | *React, FastAPI, PostgreSQL, Redis, Solidity, Hardhat, Web3.py, AES-256-GCM* GitHub

- Built a secure examination platform combining encrypted question vaults, Merkle-root chain locking, autonomous integrity agents, and verifiable result credentials.
- Developed examiner, student, admin, and public verification flows with live risk telemetry, QR-based credential verification, and integrity event tracking.
- Architected backend and blockchain modules using FastAPI, SQLAlchemy, PostgreSQL, Redis, Solidity smart contracts, Ganache, and Web3.py.

SentinelMesh – Edge AI Cybersecurity Mesh | *ESP32, TensorFlow Lite Micro, C++, Python, Node.js, Socket.IO, Polygon, React, D3.js* GitHub

- Built a decentralized IoT threat intelligence system that performs on-device anomaly classification on ESP32 nodes using TensorFlow Lite Micro.
- Designed an ESP-NOW mesh broadcast workflow and anchored SHA-256 incident hashes on Polygon through Web3.py for tamper-resistant audit trails.
- Integrated hardware inference, backend socket streams, blockchain logging, and a React/TypeScript dashboard with real-time mesh health and threat heatmaps.

Achievements & Leadership

- MyPerro branding and product presentation work contributed to Shark Tank India Season 5 Campus Special feature.
- Built and contributed to IEEE CS-VIT platforms and event experiences serving 500+ participants.
- Won Best UI/UX Design recognition at Yantra hackathon and contributed to award-winning product prototypes across AI, IoT, and product design.
