

Kunwar Shaurya Pratap Singh

✉ kunwarshaurya28@gmail.com — 📞 +91 90580 75463 — [in LinkedIn](#) — [GitHub](#) — [Portfolio](#)

Full-stack developer and AI/ML builder with hands-on experience in frontend engineering, UI/UX design, and applied machine learning. Currently working full-time at MyPerro and serving as Senior Core Member at IEEE CS-VIT. Built and shipped projects including AgriGPT, SentinelMesh, and Hack Battle. Strong in React, TypeScript, Python, Figma, Tailwind CSS, LangChain, and product-focused development.

Education

Vellore Institute of Technology , Vellore, TN	Aug 2024 – May 2028
B.Tech in Computer Science & Engineering (Artificial Intelligence & Data Engineering)	CGPA: 9.01/10
White Lead Public School , Delhi	Class XII, CBSE — 82%
St. Mary's Convent Sr. Sec. School , Uttar Pradesh	Class X, CBSE — 86%

Experience

MyPerro	Aug 2024 – Present
<i>Full-Time Frontend Developer & UI/UX Designer — Graphic Design and Marketing</i>	
- Architected and shipped the complete frontend and UI/UX for an early-stage startup, streamlining the design-to-development workflow; brand work directly supported the team's appearance on Shark Tank India Season 5. - Grew social media presence across 3+ platforms through consistent design systems and creative campaigns, driving measurable improvement in brand visibility and audience engagement. - Designed and launched user-centric landing pages and promotional assets aligned with business growth strategies, collaborating directly with founders.	
IEEE Computer Society — VIT	Feb 2025 – Present
<i>Senior Core Member — Technical & Design</i>	
Led frontend development and UI/UX design for 3+ high-traffic event platforms; mentored 10+ junior members across engineering and design domains, accelerating cross-functional project delivery.	

Projects

SentinelMesh — Autonomous Threat Intelligence Network	Equinox 2026 Hackathon
- Engineered a swarm of ESP32 hardware canary nodes mimicking real IoT endpoints (HTTP, MQTT, FTP) with on-device TF Lite Micro attacker classification — no cloud round-trip. - Implemented ESP-NOW peer-to-peer mesh broadcast for real-time swarm alerts; anchored every incident as a SHA-256 hash on Polygon testnet via Web3.py for immutable, tamper-proof evidence. - Built a React + Socket.IO live threat dashboard with D3.js attack heatmap and blockchain audit log.	
Vivayu — Proactive AgTech Platform	Live App
- Engineered a crop disease detection system using XGBoost on IoT VOC sensor data with multi-modal visual AI cross-verification for early-stage detection accuracy. - Architected <i>AgriGPT</i>, a voice-first RAG assistant (LangChain, FAISS, Groq) delivering real-time agricultural market data and auto-generated, downloadable pesticide prescription reports.	
Hack Battle — Hackathon Event Platform	Live Link
Directed UI/UX and frontend development for a 36-hour hackathon platform serving 500+ participants with game-inspired visuals; engineered registration flows and dashboards optimised for high-concurrency traffic with zero critical UI failures during the live event.	

Technical Skills

Languages	JavaScript, TypeScript, Python, C++, Java
Frontend	React.js, Tailwind CSS, Streamlit
AI / ML	LangChain, FAISS, XGBoost, Groq (LLMs), RAG, TensorFlow Lite
Blockchain	Solidity, Web3.py, Polygon (Testnet)
Design	Figma, Adobe Photoshop
Tools	Git, GitHub, VS Code, Cursor, REST API Integration

Achievements

- Shark Tank India Season 5 (Campus Special)** — Sole frontend and design lead at MyPerro since founding; merchandise, packaging, and brand assets featured on national television.
- IEEE CS-VIT Senior Core Member** — Selected as a dual-domain member (Technical & Design), one of few to hold cross-functional responsibilities in the chapter.
- WomenTechies '26, GDG On Campus VIT** — Certificate of Exemplary Performance as member of Team Togepi.
